After printing, measure one 80 mm black square with calipers and write the real number into
docs/mocap-session-protocol.md — it is the scale reference for the entire capture.

CAMERA CALIBRATION BOARD (3/3)

ChArUco · 7x10 squares · 25 mm square · 18.75 mm marker · DICT_5X5_100

Do NOT cut this page. Tape it flat to something rigid — a clipboard or stiff card. A bent board calibrates a lens that does not exist.

Measure one square: it must be 25 mm.
